AMKETTE

When Reliability Matters

Amkette, the leaders in innovation technology introduces the Wireless Optical Trackball keyboard. This feature rich keyboard makes a professional's dream, to be a couch potato, come true. This device is a bliss of ergonomics and been designed specifically to keep you off the working desk as and when you want to relax. With 2.4GHz wireless technology for precise keyboard and trackball commands, the WF-301 works up to a distance of 10mtrs.

The full-size unit is Windows 2000/ XP/ Vista/ 7 as well as MAC OS X & Linux compatible. A space-saving trackball allows easy 360-degree navigation for gamers in the family. Offering low profile keys and multimedia controls, the wireless keyboard is ideal for professionals in different sectors like BFSI, Art & Direction, Media centers etc. It's sleek & elegant design adds a look and feel of sophistication no matter where it is used.

WF 301 keyboard provides the ultimate convenience for not only general usage, but also for anyone operating in an office. Plus, The lightweight and stylish keyboard offers mobility and comfort wherever you type. The different hotkeys give you quick access to some of your most common tasks such as E-mail access, volume control, and launching your Web Browser at the push of a button.

Unique Features

- This New Technology keyboard features a Power Saving Circuit which switches the keyboard off automatically if not in use for 4 minutes.
- Full function Optical Trackball features scroll wheel and two sets of right and left buttons for ease of operation while holding the keyboard in your hands. Explaining it further, while you operate the keyboard in your hand or your lap from a distance, there are two parallel sets of right and left buttons on the left corner of the keyboard, as an alternate to the conventional positioning of the clicks right below the trackball.

2.4GHz Wireless Technology

By using 2.4GHz Radio Frequency (RF) communications technology, this path breaking technology keyboard is able function up to 10 mtrs from the host computer in any direction. RF technology is superior to the its predecessor, 27MHz, used by most wireless keyboards. The Keyboard will easily operate through the closed doors of your home entertainment center, walls and other obstacles. This technology unlike the previous one, offers secure encryption. Offering a better battery life and interference free connectivity through longer distances, this is a boon for all computer users.

Multimedia Hot Keys

Ten Multimedia hotkeys are conveniently located at the top of the unit and pave the way for easy access to the Internet, Windows Media Player etc. Instant media access is just the push of a button away.

Optical Track Ball

A space-saving 800-DPI optical trackball with a 360-degree navigation capability, makes the unit even more mobile or lap friendly, and its not necessary to have a flat surface to operate a mouse. The optical track ball eliminates the navigation problems faced by track pad users with moist, sweaty or calloused fingers.

Offering quiet operation, the well-made, black, flat unit is sleek 365 mm length x 156 mm width x 22 mm high. Its lightweight ergonomic design makes it easy to hold and operate.

Features :

- Optical trackball technology that provides precision and control
- Compact size & extreme portability
- Dynamic pairing over 6500 Id's on 12 channels provides interference free connectivity.
- Limitless connectivity angle with a wide range.
