Amkette has launched a Wireless Optical Trackball Keyboard that is Windows 2000/ XP/ Vista/ 7 as well as MAC OS X and Linux compatible. The trackball allows easy 360-degree navigation for gamers.

"Our WF 301 keyboard provides the ultimate convenience for not only general usage, but also for anyone operating in an office" commented Rajiv Bapna, Director, Amkette. "Plus, The lightweight and stylish keyboard offers mobility and comfort wherever you type. The different hotkeys give you quick access to some of your most common tasks such as E-mail access, volume control, and launching your Web Browser at the push of a button."

This New Technology Keyboard features a power saving circuit which switches the keyboard off automatically if not in use for 4 minutes. By using 2.4GHz Radio Frequency (RF) communications technology, this technology keyboard is able to function up to 10 mtrs from the host computer in any direction.

The unit is 365 mm length x 156 mm width x 22 mm high. It features:

- Optical trackball technology that provides precision and control
- Compact size & extreme portability
- Dynamic pairing over 6500 Id's on 12 channels provides interference free connectivity.
- Limitless connectivity angle with a wide range

The Amkette's new wireless trackball keyboard is available at all Amkette resellers at an MRP of Rs. 2995.
