Amkette has launched its new multimedia player Flash TV HD, promising full HD 1080p playback and compatibility with all USB storage devices. It supports all video, photo and audio formats like MKV, AVI, H264, MP4, JPEG, GIF and BMP in high resolution, which can be directly hosted on a TV screen, and play all files stored on a connected USB drive or an external hard drive.

Flash TV HD can also play movies and photos from digital camcorders and digital cameras and features some advanced options like Photo Movie with music effect, Upscaling for HD viewing, playlist creation, smart navigation for content access and resume feature for power cuts.

Speaking at the launch Rajiv Bapna, Director, Amkette, said, "Our new Flash TV HD takes television viewing pleasure to the next level with the addition of Photo movie effect, as well as exciting HD options, highest compatibility score, improved user interface and much much more."

It is backed by one year warranty and comes with a free HDMI cable worth Rs. 499. Amkette Flash HD TV is available at 6000 retail stores and large format retail stores like e-Zone, Hypercity, Landmark, More and Jumbo across India at a price of Rs. 3995.
